

Hollywood

Hollywood, Aug. 16.—Rev. A. C. I. won filled his regular appointment at the Hollywood Baptist Church Sunday. His sermon was enjoyed by all.

Those visiting in the home of C. J. Franklin Sunday were Mr. and Mrs. W. A. Franklin and family, Mr. and Mrs. Cliff Franklin, Jr. and family, Mr. and Mrs. Julian Franklin and family, Mr. and Mrs. James Franklin and family, Misses Rita Smith, Ruth Barton and Walker Franklin.

Mr. and Mrs. Jack Smith and family spent Sunday with D. L. Smith.

Miss Phyllis Taylor spent last week with Evelyn Gowin, of Vero. Misses Evelyn and Betty Gowin are spending this week with Mrs. Wesley Franklin.

All Teachers in School
Sign up for War Work
SAN BERNARDINO, CALIF.—A notice to Richardson, junior high school teachers from D. S. Holsinger, faculty member, said:

All those who will devote four hours next week to war work, please sign up.

The teachers signed up 100 per cent.

"Your response is magnificent," said another note from Holsinger. "Report to me how. I'm putting in a Victory garden."

Sow Bears Two Litters
Of Pigs in Three Weeks
ROCHESTER, IND.—Pulton county has had its best pig crop of the year recently.

Everett Best, manager of the Otto McMahon farm near here, reported that on April 13, a registered Hampshire sow gave birth to six red pigs and three weeks later, on May 4, the same sow gave birth to nine Hampshire pigs.

Best said he is bottle-feeding the six red pigs while the nine are caring for the others.

Dr. T. P. Cook, a veterinarian, said it is possible for a sow to give and to litter two litters of different breeds within such a short time but it is a rarity.

Colored Ack-Ack Fire
Shows Up in N. Guinea
SOMEWHERE IN NEW GUINEA.—A new type of anti-aircraft fire—brilliantly colored and of blinding intensity—was encountered by Flying Fortress pilots over Rabaul in the darkness of a predawn raid recently. The use of this type of anti-aircraft shell had been reported previously in Europe, but this was its first known appearance in the southwest Pacific theater.

What You Buy With WAR BONDS
4 for 1

U. S. destroyers and other anti-submarine vessels of the Navy are equipped with quadruple tubes, meaning they are capable of firing four torpedoes simultaneously, making it more difficult for the target to escape.

Modern warfare is the most expensive theater the world has ever experienced both for the destroyer and the destroyer. There is no point where we can stop in this war side of peace so all of us will be required to buy an extra \$100 bond in the 3rd War Loan.

U. S. Treasury Department

BONDS OVER AMERICA

In San Antonio, Texas, stands a million feet of which is written:

"Thermopylae had her messenger of defeat, the Alamo had none." 182 men gave their lives here in 1836.

Ever Alert Dry War Bonds

Give Blood Test To Whole Town

Types Stamped on Skin as Country Doctor Plans For Emergencies.

ARGOS, IND.—A typical American country doctor, Dr. Frank H. Kelly, located in this typical American small town, has started a project which is designed to make his entire community one great human blood bank, with every man, woman, boy and girl permanently identified as to blood type, and standing by ready to give a transfusion when and wherever needed.

Dr. Kelly's efforts to interest the average man in the street in having a blood test, and a permanent record of the type stamped on his arm, came about as the result of an attack on Pearl Harbor. As Dr. Kelly explains it, whole blood, containing both solid blood cells and liquid serum is extremely valuable for transfusion purposes but cannot be "stored" except in the human body. Since there are four types of blood, the average small town hospital is under a handicap endeavoring to keep on hand sufficient emergency supplies of all four types of blood serum.

Obstacles Overcome.
When Dr. Kelly started his blood typing campaign, there were several obstacles to be overcome. After experimenting for some time Dr. Kelly devised a method of typing the blood of large numbers of people on "wholesale" basis. This was accomplished by the invention of a special tray, divided into sections, in which the blood from many persons could be placed and "typed" at the same time, thus making it unnecessary to use the old method of thoroughly stirring each globe of blood separately.

Many experiments were made in endeavoring to permanently stamp the blood type on a person's body. Dr. Kelly finally solved his problem by adapting to his needs a vibrating tool used in industries. First, however, he had to make an entirely new type of ink with an oil vehicle to carry the color pigment into the skin and at the same time, an ink that would automatically clean and sterilize the needles.

Shows Blood Type.
When a person has No. 1 type blood, sometimes known as "AB," the No. 1 tool is pressed against the skin and in a fraction of a second, leaves a permanent small black dot to designate the blood type. When the patient is a No. 2 type, the No. 2 tool is brought into use and leaves two permanent black dots. And so on for other types.

By using the methods developed by Dr. Kelly it would be possible to "type" the blood of every person in the average small town in a few hours; and citizens of big cities could be taken care of with corresponding speed. Already most of the school children in Argos have had their blood typed and a permanent record made of it; and farmers and mothers are following suit as rapidly as possible.

New York's Water Supply Is Carefully Guarded
NEW YORK.—Forty-two miles of the 85-mile-long Delaware Aqueduct, longest bomb-proof tunnel in the world, now are in operation and are bringing water to New York city from upstate watersheds, it was disclosed recently.

Limited operation of the tunnel was decided upon, the city revealed, as an emergency measure to safeguard the water supply from bombing attacks. Previously the up-state sources of supply had been tapped by the vulnerable Croton and Catskill aqueducts. It had not been expected originally that water would be flowing through the great bore before 1945.

The Delaware Aqueduct, built at a cost of \$200,000,000 and now almost complete, was drilled through solid rock hundreds of feet underground between the Rondout Reservoir at Lackawanna, N. Y., and New York city. It is 10 feet in diameter, is lined with concrete and is operated by high-pressure pumps. The tunnel links the Croton and Catskill watersheds and eventually will tap the sheds.

Frank Could Have Been A Member of Parliament
SOMEWHERE IN AUSTRALIA.—Second Lieut. Frank J. Payne of Evanston, Ill., finally was in the Signal corps, where he belongs, after spending nine months in a military police company due to an error at the reception center.

Before he was inducted Payne had three years' experience in motion pictures and two in radio.

The interview at the reception center, filling out a questionnaire, wrote. "Two years radio, three years M. P."

Payne found himself assigned to an M. P. company. It took him nine months to extricate himself.

United States Fliers Hosts to Arab Children
WASHINGTON.—The trend of sightseeing in Tunisia took a new turn recently when an officer from a United States army air force base was host to a group of Arab school children, according to a report received by the war department. "Our soldiers in North Africa used to be the sightseers, but now the tables have turned on them," Lieut. Col. Graham W. West of Portland, Ore., commanding officers and mothers are following suit as rapidly as possible.

Apple Pie Proves Sure Cure for Homesickness
DENVER.—Old-fashioned apple pie rates as the No. 1 cure for the homesickness of United States soldiers in India. Hortense Addison, recreational worker at a Red Cross post in India, said in a letter to her mother at Denver that a cooked American meal will cure a case of mass homesickness "in about one second," especially if it is topped off with apple pie.

Find Mountain Of Beryllium

Hailed as World's Largest Known Deposit of Critical Metal.

WASHINGTON.—Discovery of a "mountain" of beryllium ore in southern Oregon puts the United States in position to develop this strategic material right in its own back yard. Hailed as the world's largest known deposit and as having high percentage content of the war essential metal, the deposit has been reported to the War Production board. Normally, beryllium is imported from Brazil, Argentina and South Africa, says the National Geographic society.

Pure beryllium is three times lighter than aluminum, is harder than steel and is rust-proof. It is ideal for airplane construction if it were not so brittle. A piece dropped on the floor will shatter. Scientists are working on a treatment that will retain the metal's lightness and hardness, while overcoming its brittleness.

Hardens Soft Metals.
Adding 2 per cent beryllium to 98 per cent copper or nickel changes these "soft" metals into alloys harder, stronger and with more tensile strength than the best steel.

Lowly improving, last Sunday, Mrs. Victor Jones and children, Nelson, Robert and Lorene, also visited in the same home last week. She has returned to her home in Baltimore, Md.

Those visiting Mr. and Mrs. T. Phelps over the week-end were Carlisle Phelps and family, Mrs. William Mitchell and Mrs. Elmo Crews.

Mr. and Mrs. Wayne Harris and family, of Richmond, are spending some time with their mother, Mrs. K. H. Smith, Mrs. Western Baptist church, of Richmond.

Mr. and Mrs. L. M. Kern have returned to their home after visiting their son, Martin Kern, in Alexandria.

Rocks News

Shocks, Aug. 10.—In spite of the gas shortage, a goodly number attended the revival services at Rocks March last week.

Mr. and Mrs. Jim Frank Ransom went to Farmville Monday to get the latter's glasses fixed.

Mr. and Mrs. Dean Pugh called to see their parents, Mr. and Mrs. J. Marsh Tuesday night and the latter's glasses fixed.

Mr. and Mrs. Bernard Richardson and son, of Newport News, spent Tuesday night with her mother, Mrs. D. R. Inge, of Pamplin.

Mrs. Victor Jones and children, Nelson, Robert and Lorene, also visited in the same home last week. She has returned to her home in Baltimore, Md.

Those visiting Mr. and Mrs. T. Phelps over the week-end were Carlisle Phelps and family, Mrs. William Mitchell and Mrs. Elmo Crews.
